Competitor comparison matrix

Your website reached page one for none of the 11 target searches. Five of these 13 rivals print a licence number; your site prints none.

The rivals all came from Google.com.pk results for the 11 searches, checked once from one Pakistani connection. URL columns count words in sitemap paths, so they show how much a site has on a topic and nothing about quality. Your C11 guide is at /work-permit-canada, which is why your C11 count is 0.

O **Observed** on public pages or Google on 8 Nov C **Claimed** by the firm, not checked with any regulator

Licence numbers were looked for on each home page and on about pages for five rivals, so “None found” may miss a number printed elsewhere. Ratings appear only where Google displayed them during these searches. “Says no guarantee” and the percentage claims are each firm’s own home page wording.

Backlinks, authority scores and traffic are not available for any rival and have not been estimated. MA Law also appeared in the results but could not be reached, so it has no row.
